

## Pulastic® Classic

Reflex Pulastic® Classic is our premium, seamless, point elastic sports floor system. Unlike other synthetic surfaces, Polyurethane is a resin that is poured on site with no welds or join marks visible on the finished surface. It is completely unique in that the flooring can be sanded and re-poured to create very long life-cycles. Available in a wide range of colour options, Pulastic® Classic is the ideal solution for most environments.
